

Download Photosynthesis Cellular Respiration Study Guide Answers

Start studying Biology: Photosynthesis/Cell Respiration Study Guide. Learn vocabulary, terms, and more with flashcards, games, and other study tools. Cellular Respiration Once the energy that was in sunlight is changed into chemical energy by photosynthesis, an organism has to transform the chemical energy into a form that can be used by the organism. Photosynthesis and Cellular Respiration Study Guide 1.1 Energy for Life 1.

Vocabulary to know: A. ATP energy-carrying molecule that cells use to power their metabolic processes B. Autotroph/ Producer organism that makes its own food C. Cellular Respiration process in which cells break down glucose and make ATP for energy 4.4 Study Guide | Overview of Cellular Respiration | KEY Directions: Answer the questions using your notes, your knowledge, and or section 4.4 from the textbook. 1. What is cellular respiration? A process that releases energy from sugars and other carbon-based molecules to make ATP when OXYGEN is present.
